HARVESTfresh™

Inspired by nature, powered by light

Even though they keep looking fresh, fruits and vegetables start to lose their vitamins when placed in the fridge. Thanks to innovative HarvestFresh™ technology, vitamins are preserved for longer*. Unique crisper technology developed for Beko fridges uses not one, but 3 efficient colours, that mimic the 24 hours sun cycle and natural sunlight. All of this so you can enjoy nutritious meals and a healthier lifestyle.

*Tested by Intertek based on Vitamin C and Vitamin A measurements in tomato, green pepper, carrot, spinach and celery directly exposed to the light technology compared to Day 0 conditions over a 5-day period.

AEROflow™

Gentle air distribution for lasting freshness

Nature put its own expiration date on its gifts. The appearance and shape of food is related to its freshness, and keeping this freshness for longer requires gentle care, just like in nature. Now, Beko's gentle and even care for food inside the fridge offers long-lasting freshness. With less direct cold air blowing on fresh food, less dehydration occurs. The innovative Beko AeroFlow™ cooling system minimises temperature fluctuations inside the fridge and reduces temperature differentiations between shelves with surrounding gentle air distribution for lasting freshness. Since longer freshness of nutrients is a key element of healthy living, AeroFlow™ technology takes care of food inside the fridge in a gentler way. It surrounds food with evenly distributed cold air to keep them fresh, vivid and juicy for longer.

ProSmart™ Inverter Compressor

High efficiency, high durability, low noise

Don't pay lots of money for electricity bills just for a refrigerator that does the job. You can open the door as many times as you like, ProSmart™ Inverter Compressor technology will adapt and create fewer temperature variations, provide faster cooling with less energy, and allow your food to stay fresh for much longer. The compressor's design provides more durability while being 4 times quieter.

Vacation Mode

Extra energy saving

Get your fridge in the holiday spirit when you leave for vacation. Vacation Mode saves energy by shutting down the cooler section but keeping the freezer running. Frozen food will be preserved while you save on energy bills.
